

KRYSTINA RADKEVICH

[LinkedIn](#) | kradkev@icloud.com

Upon completing my PhD, I aspire to pursue a career in academia. I am passionate about both research and teaching, and value the opportunity to contribute to each. Through my research, I hope to investigate meaningful problems that generate significant insights, advance academic knowledge, and create value for academia, industry, organizations, and society. As an educator, I aim to inspire students to think critically, pursue their own research interests, and develop the skills and confidence to make meaningful contributions throughout their academic and professional careers.

RESEARCH INTERESTS

- Empirical research for societal impact, applying data-driven methods to address real world challenges and improve decision-making in domains including healthcare and public policy.
- Digital platforms and reputation systems, with a focus on how ranking algorithms, review aggregation, and platform design influence the measurement and communication of product and service quality.
- Personalization and recommender systems, exploring how digital platforms can better tailor recommendations and information to individual consumers rather than relying on union measures of quality.
- Artificial intelligence and algorithmic decision-making, investigating bias in AI systems, the role of human input in shaping AI outputs, and strategies for developing safe and trustworthy AI.

EDUCATION

Master of Science in Management (MSc), Quantitative Marketing. (GPA: 3.82/4.3)

Sep 2025 – Aug 2026

*Smith School of Business, Queen's University
Kingston, Ontario*

Supervisor: Dr. Yulia Nevskaya

Relevant Coursework: Research Foundations, Statistics and Econometrics, Econometric Methods, Bayesian Analysis, Management Research Topics, etc.

Bachelor of Science Honours (BSch), Mathematics and Statistics. (GPA: 3.36/4.3)

Sep 2021 – May 2025

*Queen's University
Kingston, Ontario*

Relevant Coursework: Linear Algebra, Statistics & Probability I, Statistics & Probability II, Elements of Computing Science, Introduction to Real Analysis, Ordinary Differential Equation, Applied Methods Statistics I, Statistical Learning I, Discrete Time Series Analysis, R for Data Science, etc.

RESEARCH EXPERIENCE

Master's Thesis – Consumer Heterogeneity in Online Reviews: How Average Consumption Profiles Influence Evaluative Disagreement

Supervisor: Dr. Yulia Nevskaya

- Constructed one of the largest reviewer-pair datasets from TripAdvisor, consisting of over 6 million paired restaurant evaluations.
- Designed and implemented a large-scale empirical study in R to examine how differences in reviewers' prior consumption profiles influence disagreement in online ratings.
- Applied panel data methods, fixed-effects models, and cluster-robust inference to analyze reviews data.
- Investigated how consumer heterogeneity shapes online evaluation systems and the implications for aggregated ratings that are often displayed online.

Research Project - Consumer Heterogeneity in Online Review Content

Supervisor: Dr. Erica Pimentel

- Applying natural language processing and text analytics techniques to large-scale restaurant review datasets.
- Investigating how review content differs across consumers with varying levels of platform experience and consumption profiles. Examining the consistency of review information within reviewer groups, and the differences between groups.

- Exploring how consumer heterogeneity can inform the design of more personalized and effective online review and recommendation systems.

Research Assistance - Exploring Potential Biases in Judicial Decision-Making

Supervisor: Dr. Alba Olivares Nadal

- Investigating potential biases in judicial decision-making using large-scale court datasets.
- Helping to develop data processing and analysis pipelines in Python for large-scale empirical research.
- Conducting statistical analyses using causal methods such as nearest-neighbour matching and propensity score matching.

WORK EXPERIENCE

Head Teaching Assistant, Queen's University

December 2025 – April 2026

Kingston, Ontario

- Managed a team of 7 teaching assistants while overseeing tutorial delivery, exam prep sessions, quiz proctoring, and office hours for an undergraduate managerial statistics course (COMM162).

President, Queen's Mathematics and Statistics Department

May 2024 – April 2025

Kingston, Ontario

- Led a team of 20 student council members to organize academic, professional, and community events including exam preparation sessions, Industry Night, Pi Day initiatives, and monthly newsletters.
- Collaborated with faculty to propose curriculum improvements, contributing to an enhanced learning experience for more than 240 students.

Data Analyst Intern, Scotiabank

May 2024 – August 2024

Toronto, Ontario

- Evaluated account legitimacy by analyzing transaction history using PRM (Proactive Risk Management) and Intralink to gather user information.
- Assessed ATM footage for suspicious transactions, leveraging the Command Video Management Software to identify potentially fraudulent activities.
- Utilized Excel to organize and present data, creating clean and actionable reports for further analysis.

Risk Analyst Intern, Scotiabank

May 2023 – August 2023

Toronto, Ontario

- Investigated data trends to identify risk mitigation strategies in AML and ATF.
- Performed comprehensive analysis in attributes such as Testing and Training at the bank to assess performance and monitor risks. Utilized PowerPoint and Power BI in displaying findings.
- Collaborated closely with compliance departments and regulatory agencies to confirm adherence to requirements.

Technical Skills: R, Python, Excel, Microsoft Office, Power BI.

Analytical Methods: Regression analysis, fixed-effects models, propensity score matching, hypothesis testing, data cleaning, text analytics, natural language processing.

Others: Russian (Fluent), French (Intermediate), Math.
